Volume 152

A. Sikder, Attracting theorems for cyclic sets and impermanence 1
J. Grasman, Stochastic epidemics: the expected duration of the endemic period in higher dimensional models 13
W.-Y. Tan and Z. Xiang, A state space model for the HIV epidemic in homosexual populations and some applications 29
L.H.R. Alvarez, Optimal harvesting under stochastic fluctuations and critical depensation 63
A.B. Gumel, K. Kubota and E.H. Twizell, A sequential algorithm for the non-linear dual-sorption model of percutaneous drug absorption 87
B. Vielle and G. Chauvet, Delay equation analysis of human respiratory stability 105
F. Clément, Optimal control of the cell dynamics in the granulosa of ovulatory follicles 123
J.E. Mittler, B. Sulzer, A.U. Neumann and A.S. Perelson, Influence of delayed viral production on viral dynamics in HIV-1 infected patients 143
M. Fan and K. Wang, Optimal harvesting policy for single population with periodic coefficients 165
A. Tsodikov and W.A. Müller, Modeling carcinogenesis under a time-changing exposure 179
